

YOUR SMART WAY

by **tedee**

Open the door to an easier life.

For Your Home

Forget your keys forever.
Save time and enjoy peace of mind without the risk of lost keys. Your smartphone, along with those of your family members, becomes the key to your home.

Designed for your B&B or Holiday rental property

Provide your guests with a seamless, keyless self-check-in experience.
Grant and manage access for maintenance personnel and service companies
Keep your property secure by ensuring that doors are never left open unintentionally.

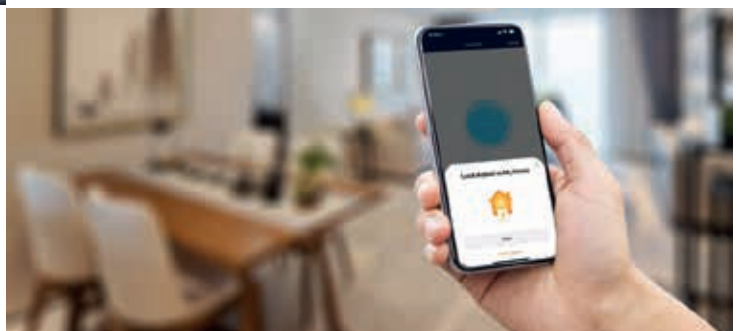

For your business or Office

Leave access cards and physical keys behind. With Tedee, you can build a secure and easy-to-manage access control system. Create a hierarchy of access permissions, allowing or restricting entry to specific areas reserved for authorized personnel only. Grant access to new employees instantly, without waiting for physical keys to be produced and distributed. Monitor your premises remotely and ensure that doors are locked and your facilities remain secure at all times.

Compatible with the most popular smart home system.

Tedee works seamlessly with the world's leading smart home platforms. From Alexa and Google Home to Fibaro and the latest Matter standard, it is designed to integrate quickly, securely, and intelligently into your smart home ecosystem.

How does a smart lock work?

Your personal virtual doorman

Forget fumbling for your keys when you're in a hurry or your hands are full. Your home will be ready to welcome you, with the door unlocking automatically for a seamless entry.

Automatic locking

Automatic unlocking

Your virtual access keys

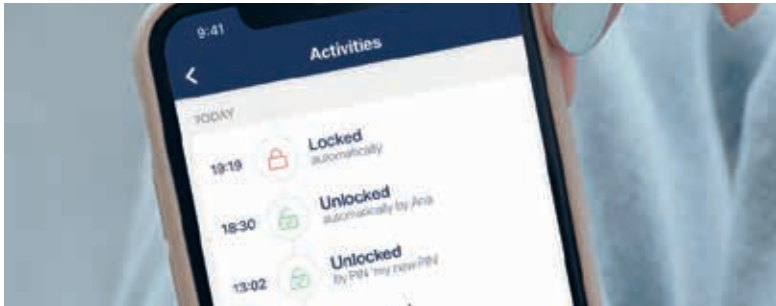

What if handing over keys worked as easily as sending an email? With just a smartphone and our app, you can grant access in seconds, without ever having to hide a key under the doormat.

Three users levels

Strict access permissions

Access report

Stay in control of who enters your home with Tedee. View detailed, real-time access records whenever you need them, right from your app.

Push notification

Real-time activity history

Your highest level of protection

Connect your Tedee lock to the cloud and enjoy state-of-the-art protection. The security standards are comparable to those used by online banking platforms, giving you complete peace of mind.

Advanced security Cloud

Not visible from outside

Can be also be unlocked with a key (with clutch cylinders).

Securely mounted on the inside

Unlock manually or at the touch of a button.

Smart Locks

Tedee GO2

No replacements required, not even your keys!
With an existing clutch cylinder you can upgrade your door lock to a digital access control system in under 30 seconds.
Simply purchase a Tedee Go2 and install it directly onto your existing cylinder.
Fast, easy and intuitive, for anyone looking for innovation and simplicity.

Complete your smart ecosystem!

Bridge

With Bridge, all you need is an internet connection to control your access points from anywhere in the world. Unlock doors remotely, monitor the activity of your smart locks, and check that your guests have securely closed the door when they leave. Everything in real time, right from your smartphone!

Tedee PRO Keypad and Door Sensor

Enhance your security and easily manage temporary access for guests, staff or maintenance personnel. The keypad ensures you always have a reliable way to enter: if your smartphone connection is unavailable, simply enter your access code or use biometric fingerprint recognition. Need to grant access for a maintenance visit? Send a temporary code to the technician in just a few taps. Once the job is done, you can verify that the door has been properly closed using the door sensor, directly from your app or web portal.

A complete range of accessories and services.

BleBox Smart Relay Module

Turn your gate and garage door into smart access points with Tedee. This device lets you open and manage your gate and garage door directly from your smartphone via the Tedee app, eliminating the need for keys, access cards, remote controls, and badges.

Tedee Dry Contact

Adding a wireless smart lock to your wired digital ecosystem is simple and possible with our Dry Contact module. A Bluetooth module that integrates Tedee GO2 with your existing wired smart systems
